For the City Traffic Control Division, Traffic Signals, Inc., will be replacing the traffic signal controller cabinet at the Rock Creek Road intersection with Stubbeman Avenue on Thursday, February 14, 2013, weather permitting. After 9:00 A.M., the intersection will be controlled by a 4-way STOP sign. Signal operation should be restored before 12:00 P.M. This cabinet replacement is needed to fully support the recently installed flashing yellow arrows at the intersection.

The on-going flashing yellow arrow project is part of an ongoing \$300,000 project, funded with 100 percent Federal Safety funds, to upgrade a total of 57 intersections within the City of Norman to flashing yellow arrows. Traffic Signals, Inc., serves as the contractor for this project. Any questions about the project or this cabinet replacement should be directed to David Riesland, City Traffic Engineer, at 329-0528.
